PROJECT DETAILS

Client & Project Name: Swish – <https://app.swish-inc.jp/>

Project Description: This project is created for the company profile. The company can register on the portal and manage furniture orders. The application provides them with a furniture list, the company can select the furniture for designing the office infrastructure. The organization can order what furniture they require for their office.

Roles: Senior Full Stack Developer

Technology: NextJs & Tailwind css & Laravel

Client & Project Name: Jeeva – <https://jeevatrials.com/>

Project Description: Jeeva identified travel requirements for clinical trial patients as a major barrier to recruitment and retention. The COVID-19 pandemic is accelerating the demand to decentralize the way clinical trials are conducted. Sponsors, investigators, regulators, and participants are all embracing the potential of digital technologies to reduce the cost, increase the speed, and ease the burden on participants in these studies.

Roles: Senior Full Stack Developer

Technology: React Js, Python

Client & Project Name: Emerald AI

Project Description: In this application users can register. The app user can create a project and upload different images. He can tag and annotate images. After adding multiple projects he can compare his project data and view the compare results in chart view for example in bar chart & pie chart & doughnut chart & scatter chart. He can export the chart and compare data in excel files.

Roles: Senior Software Developer

Technology: React js, Material UI, Python

Client & Project Name: Mammalz - <https://mammalz.com/>

Project Description: Mammalz is a groundbreaking media ecosystem dedicated to the storytelling of our natural world. Dive deep into our mobile and web apps where anyone, anywhere can create an immersive media experience. Become part of the adventure alongside social communities of media makers, scientists, and nature lovers like you.

Roles: Senior Software Developer

Technology: React js, Material UI, Backend Laravel

Client & Project Name: ITBD - <https://itbd.net/>

Project Description: In this application any company can register and add their employees. The company admin can create NPS, CSAT & Custom Surveys. The application also provides Score management tool, Performance evaluation matrix, Rewards & points for employee's. The company can set goals and metrics for evaluation of their employee's performance.

Roles: Lead Front End Developer

Technology: Angular 9 & Python

Project Name: Ventract - <https://ventract.com/>

Project Description: Ventract is a live reverse- auction bidding platform that allows property owners/managers, developers, contractors and supply vendors the opportunity to compete in real-time for jobs and supplies. This format enables a subscriber to achieve the most competitive results in a timely manner. An example of a reverse auction process would be a property owner looking to renovate or upgrade. Once job specs are uploaded to the site, all existing subscribers (contractors) would have the opportunity to compete for the particular job by bidding through the live reverse auction platform. The property owner/manager would then have the opportunity to select the most competitive bid based on price, user reviews, previous work done, etc. Likewise, the contractor has the opportunity to seek the most competitive pricing by bidding out their supply list.

Roles: Full Stack Developer

Technology: Angular 6, 7, NodeJs, Express Js, MongoDB, Firebase

Client & Project Name: <http://www.findfriendz.com/>

Project Description: A Social Networking website People can register and make friends, create and share photo albums, share web links with friends, write notes, join or create groups, manage their events.
